(Deemed to be University under section 3 of the UGC Act 1956)

Salem, Tamil Nadu - 636 308.

About the College

Vinayaka Mission's Kirupananda Variyar Engineering College is an initiated educational background, aimed to provide quality education to aspiring technocrats in various fields of engineering sciences. It started way back in 1987 with 3 branches approved by AICTE, New Delhi. Initially affiliated to the University of Madras, Periyar University and later on to Anna University. Later, Elevated to Deemed University status and hence forth, it has been a constituent college of Vinayaka Mission's Research Foundation (Deemed to be University) in 2004. At Present the institution has 8 branches under UG & 4 Specialization program under PG along with MBA under various specialization offering higher educations. The institution is approved by AICTE and accredited by NAAC.

About the Department

Department of Biotechnology was established in the year 2005 with sophisticated laboratories and dedicated faculty members to develop academic excellence and to cater the need of modern Industry. The Department is involved in research activities and grants are received from various Government agencies such as DST, TNSCST, MSME, MSME-CoE, Bangalore. Memorandum of Understandings (MoUs) with industries and research institutions was also signed by the Department.

About the Conference

Agriculture depends on environmental factors and production practices for improvement. Agricultural Engineering is developed to make advances in sustainable agriculture, focusing on biological engineering, efficient use of irrigation water, renewable energy and environmental issues. Though advanced technologies already exist for food processing, new technologies are emerging that leads to the solution of food and nutrition problems in the modern world.

Nutraceuticals are food or part of food that apparently provides medicative or health advantages and acts as nutritional medical supplements. The demand for nutraceuticals has increased over the past few years and they are being used for various therapeutic outcomes.

The Conference will be a premier platform to bring together the academicians, researchers and industrialists to accentuate on the various themes allied to agriculture, the concepts, and recent explorations to increase productivity, profit, health and safety. To disseminate information on indigenous methods of food processing, preservation, packaging, food safety and quality control and to carve the focal points in the design and development of novel nutraceuticals.
